UTILITY

None promised. It's a memecoin.

This Frogpaper describes a memecoin for entertainment purposes. It is not financial advice, not an offer and not an investment contract. Please read the Legal Disclaimer on page 17.

// 01 • MANIFESTO

It's not just a meme. It's a mindset.

\$DEG3NFR0G is a community memecoin on Solana, fair-launched on Pump.fun on October 25, 2026. No presale, no paid shills, no influencer deals, no pay-to-win. It also has no intrinsic value and no promised utility. We say that up front, because honesty is the whole point.

Crypto is loud. Most launches are louder: bought calls, paid "alpha" groups, insider wallets and presales that get dumped on whoever shows up last. The DegenFrog is our answer: a frog in chart sunglasses who stays on the charts through the chaos and refuses to pay anyone to shout his name.

This Frogpaper is not a technical whitepaper. There is no protocol to describe and no product to sell. It is a field guide: who the frog is, what the frog army stands for, how the launch works, how to stay safe, and what we will and won't ever claim.

It's for the dreamers, the risk takers and the ones who never settle. It's for degens who know exactly what a memecoin is, and who would rather hold a meme with an honest story than a "project" with a fake one.

Share the memes, raid the timeline, and bring your frens to the pond. **Frogs never leave the charts.**

NO PRESALE

No whitelist, no private round, no early access. Same curve, same chance.

NO PAID SHILLS

We don't buy promo or calls. If someone posts about the frog, it's because they want to.

NO INFLUENCER DEALS

No paid KOL allocations, no secret bags for "marketing partners".

NO PAY-TO-WIN

Nobody can pay to get in before everyone else. Not us, not anyone.

THIS DOCUMENT IS

- ✓ The frog army's rules for safety and organic growth

THIS DOCUMENT IS NOT

- ✗ A promise of profit, returns, price or utility
- ✗ A roadmap guarantee or financial advice

// 02 · THE LORE

The frog who lived on the charts.

CHAPTER I

The swamp before the candles

Before there were charts, there was the swamp: a quiet, muddy place where frogs croaked at the moon and nobody counted anything. Then one night a green candle lit up over the water. Then a red one. Then a thousand more. Most frogs hopped away from the strange glowing lights. One didn't.

CHAPTER II

The glasses

He stared at the candles for so long that they burned into his sunglasses. Look into his lenses today and you'll see the charts reflected back: green wicks, red wicks, the whole story. He has never taken them off. Some say he can't. Some say he doesn't want to.

CHAPTER III

The night shift

Charts never sleep. Neither does the frog. While the rest of the swamp dozed, he found a hollow under the roots of an old mangrove, wired up a wall of screens and called it **the Degen Den**. He pulled on a black leather jacket with a hand-stitched DEGEN patch, put something on to brew, and started the night shift. He has been on it ever since.

// THE LORE · PART TWO

The Degen Den & the pond.

CHAPTER IV

The offer

Word spread about the frog who never left the charts, and eventually the suits came hopping. "We'll pay you to shout about our coin," said one. "Join our presale and get in before the little frogs," said another. "Pay us and we'll make you trend," said a third. The frog lowered his glasses an inch, looked at them, and pushed them back up. "Nah." That was the whole conversation.

CHAPTER V

The frog army

Then something strange happened. Other frogs started showing up at the Den. Nobody paid them. They came because they had been rugged, faded and shilled at, and they were tired of it. They wanted one place where everyone hops in the same way, at the same time, on the same curve. They pulled up a lily pad. Then another. The pond got crowded, and they started calling themselves **the frog army**.

CHAPTER VI

Still watching

The frog is still there tonight. Same glasses, same jacket, same screens. He doesn't promise anyone anything. He just never leaves the charts, and neither do his frens.

"Nah."

THE DEGENFROG, TO EVERY PAID-SHILL OFFER EVER MADE

CHAPTER VII IS YOURS

The story is simple. The frog army writes the rest. Comics, edits, fan-fic, songs, 3 a.m. Den stories: post them with **\$DEGENFROG** and the best ones may be collected as community lore. Lore is for fun. It is not a promise about the token.

// 03 · THE MEANING

What is a degen frog?

A degen frog takes risks with eyes open, owns their decisions and stays through the chaos, without lying to anyone about it.

In crypto slang, “degen” started as an insult and turned into a badge: someone who goes all in on wild ideas. The degen frog is the honest version. You know a memecoin is a gamble. You only use what you can afford to lose. You don’t pretend otherwise, and you don’t sell anyone a dream.

The DegenFrog is a symbol for those real degens: the ones still around when the candles turn red, the timeline goes quiet and the tourists leave. Not because someone paid them to stay, and not because anyone promised them anything, but because they like the frog, the memes and the people.

A DEGEN FROG...

01

Stays through the chaos

Red candles, FUD, silence. Still in the pond, still croaking.

02

Says the quiet part out loud

Memecoins are risky. No price talk, no fake promises.

03

Creates instead of shilling

Memes, art and edits beat copy-paste hype every time.

04

Helps the next tadpole

Explains wallets, warns about scams, points to official links.

05

Never pays for hype

And never takes payment to shout about the frog.

06

Verifies before trusting

Don’t trust, verify. The chain is the source of truth.

A COUNTER-STATEMENT TO PAID-SHILL CULTURE

Too many launches are “marketed” through paid posts and secret influencer allocations, and audiences rarely know who was paid. We think that’s broken. \$DEG3NFR0G pays nobody for promo. If someone offers paid shilling in our name, it isn’t us.

A COUNTER-STATEMENT TO PAY-TO-WIN LAUNCHES

Presales, whitelists and private rounds let insiders buy before everyone else. \$DEG3NFR0G has none of that. Everyone buys from the same Pump.fun bonding curve, from the same starting line.

ITS OWN FROG

The DegenFrog is an original character with its own look and lore. He is **not Pepe** and not affiliated with any other frog, meme, project or token. **We don’t follow. We croak.**

// 04 · TOKENOMICS

No tricks. Same curve for all.

\$DEG3NFR0G launches on Pump.fun's bonding curve. Supply and curve details are set by Pump.fun and are visible on the coin page from launch. We don't invent numbers. Check everything yourself.

THE LAUNCH MECHANISM

The token is created through **Pump.fun's standard fair-launch mechanism**. From the first second, anyone can buy from the same bonding curve at the same time. There is no presale, no whitelist, no private round and no paid KOL or influencer allocation.

Pump.fun's standard rules decide how the curve works and what happens when it completes. Those rules belong to Pump.fun, not to us, and they can change, so read Pump.fun's own documentation for the current version.

- 6 **Play fair.** No bots, no fake engagement. Follow each platform's rules.

CREATORS & TIKTOK

Anyone can make content about the frog. We don't pay for it and we don't hand out allocations for promo. If you create: say if you hold, follow your local advertising rules and each platform's rules on financial content, and never present a meme as financial advice.

Four steps. Zero sleep.

New to Solana? No problem. Follow these steps and you'll be in the pond in a few minutes. Read every step before you start, and only spend what you can afford to lose.

01

Get a wallet

Download **Phantom** from the official site (phantom.com) or your official app store. Write your seed phrase on paper, keep it offline and never share it.

02

Load up on SOL

Buy SOL on an exchange or directly in Phantom and send it to your wallet. You need SOL for the swap and for network fees.

03

Go to Pump.fun

Open Pump.fun, connect your wallet and paste the official \$DEG3NFR0G contract address. **Always check the CA.**

04

Swap & join the army

Enter the amount of SOL, confirm the swap, and welcome to the frog army. Only spend what you can afford to lose.

Copypat tokens with similar names will appear. A matching name or logo means nothing. Only the CA from official channels counts.

// 09 · SAFETY

The frog never DMs first.

Where there's a launch, there are scammers. The frog army protects itself by knowing the rules by heart. If something breaks one of these rules, it's a scam. No exceptions.

01 The team never DMs first. Anyone who DMs you "from DEG3NFR0G" is not us.

02 Nobody will ever ask for your seed phrase or private key. Not support, not mods, not the frog.

03 We never ask you to send funds. No "verification", no "claim fee", no "double your SOL".

04 There is no presale and no whitelist. Anyone selling one is a scammer.

05 We don't buy promo. Anyone offering paid shilling in our name isn't us.

06 The only CA is the one on official channels. Never trust a CA sent to you in DMs.

COMMON SCAMS & HOW TO SPOT THEM

SCAM	WHAT IT LOOKS LIKE	WHAT TO DO
Copycat token	Same name and logo, different CA	Compare the CA with official channels only
Impersonators	Look-alike handles (O instead of 0, extra letters), copied avatars	Use the links in this Frogpaper; report and block
Fake support	"Admin" or "support bot" DMs you after you post in the pond	Real mods never DM first. Ignore and report
Wallet drainers	"Claim your airdrop / reward" links asking you to sign	Never sign transactions from random links
Fake presale	"Early access before launch, send SOL here"	There is no presale. Ever.
Fake giveaway	"Send 1, get 2 back"	Always a scam. Nobody doubles your SOL

IF SOMETHING FEELS OFF

Stop. Don't click, don't sign, don't send. Ask in the pond (t.me/Deg3nfr0gofficial) whether a link or account is official, and a Pond Guardian or mod will help publicly.

IF YOU GOT HIT

Move any remaining funds to a fresh wallet if your seed phrase may be exposed, report the account, and warn the pond. Solana transactions can't be reversed, and "recovery services" are scams too.

// 10 · TRANSPARENCY

Don't trust. Verify.

We would rather show you an honest blank than a made-up number. Anything we can't prove on-chain yet is marked clearly, and filled in from on-chain data after launch.

WHAT YOU CAN ALWAYS EXPECT

- ✓ The CA is posted only on official channels, and nowhere else first
- ✓ On-chain details are published after launch, and the placeholders in this Frogpaper are filled from chain data
- ✓ No presale, no private allocations, no paid KOLs
- ✓ Plans are labelled as plans. No fake partnerships, no fake numbers
- ✓ Every change to this Frogpaper gets a new version number and a changelog entry

Where can I find the contract address (CA)?

The official CA will be posted at the top of the official website and on [@DEG3NFR0G](#) right at launch. Never trust a CA sent to you in DMs.

No memecoin is safe, and nobody knows where the price goes. We make no predictions and no price targets. Only risk what you can afford to lose.

Does \$DEG3NFR0G have utility?

No utility is promised. It's a memecoin: a community, a frog and a culture. Anything else on the roadmap is a plan, not a promise.

What do frog army ranks give me?

Bragging rights and good vibes, nothing financial. Ranks carry no tokens, airdrops, allocations or rewards.
